PROFILE SUMMARY

Final-year B.Tech Information Technology (IT) student with expertise in Full-Stack Web Development, Data Analytics, SQL, and MERN Stack technologies. Skilled in developing responsive web applications, managing databases, and applying data preprocessing, visualization, and machine learning techniques to derive meaningful insights. Passionate about leveraging technology to create innovative, efficient, and user-centric solutions.

EDUCATION

Sastra Deemed University <i>B.Tech, Information Technology GPA: 7.008</i>	Expected June 2027
Mount Zion Matric. Hr. Sec. School <i>Higher Secondary Percentage: 87.5</i>	April 2023

PROJECTS

Automated Fetal Ultrasound Plane Classification using Deep Learning : Developed a deep learning-based system for automated classification of fetal ultrasound anatomical planes using CNN architectures.

- **Technologies:** Python, CNN, VGG19, EfficientNet-B4, Transfer Learning
- Applied transfer learning and preprocessing techniques in medical imaging datasets to improve feature extraction and model performance.
- Performed model tuning and evaluation using standard metrics, achieving 97

PhishGuard – Enterprise Phishing Simulation Platform : Developed a full-stack phishing awareness and simulation platform to help organizations assess employee security awareness through realistic phishing campaigns, email template management, campaign tracking, and reporting dashboards.

- **Technologies:** Python, Flask, SQL, HTML, CSS, JavaScript, Bootstrap, Jinja2
- Built a role-based web application for managing employees, departments, phishing campaigns, email templates, and activity logs using Flask and SQL databases.
- Developed phishing simulation workflows with email campaign management, click tracking, employee training redirection, and security awareness reporting.
- Created interactive dashboards and analytics modules to monitor campaign performance, employee engagement, phishing susceptibility metrics, and organizational security trends.

EXPERIENCE AND INTERNSHIPS

IT Intern	Present <i>Tamil Nadu Generation and Distribution Corporation (TANGEDCO)</i>
------------------	--

- Assisted in web development activities, contributing to the design and implementation of application features and system enhancements.
- Supported cybersecurity initiatives by participating in phishing awareness programs, email security monitoring, and threat identification activities.

SKILLS

Programming Languages: Python, JavaScript, SQL

Web Development: HTML, CSS, JavaScript, Flask, Bootstrap

MERN Stack: MongoDB, Express.js, React.js, Node.js

Data Analytics Machine Learning: Data Preprocessing, Data Visualization, Exploratory Data Analysis (EDA), Pandas, NumPy, Scikit-learn

Databases: MySQL, MongoDB, SQLite

Academic Coursework: Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Computer Networks, Operating Systems

Soft Skills: Problem Solving, Critical Thinking, Communication, Team Collaboration, Adaptability
